City of Houston
Houston Airport System

Request for Qualifications

Runway and Taxiway Design in support of the Environmental Impact Study
at
George Bush Intercontinental Airport/Houston
Houston, Texas

Project No. 644
CIP No. A-0540 & A-0568

The City of Houston invites submittals from qualified firms interested in providing professional engineering design services for runway and taxiway design in support of the Environmental Impact Study (EIS) at George Bush Intercontinental Airport/Houston. The Phase I scope includes preliminary engineering of up to four (4) alternative layouts of airport facilities in support of the EIS analysis. Preliminary engineering for the purposes of the EIS is defined as 25 percent design. Specific tasks associated with preliminary design include: topographic survey, geotechnical investigation, development of horizontal alignments, development of vertical alignments, development of pavement limits, development of construction limits, and order of magnitude cost estimate. It is anticipated that Phase I will lead to the Phase II (final design) and Phase III (construction services) of a new runway and taxiway. Work will be done according to standard City Of Houston contract Phase I, II, and III services.

All firms interested in providing such services should obtain a copy of the prospectus, which includes a more detailed description of the work, Disadvantaged Business Enterprise (DBE) participation and submittal requirements, available at the office of Planning, Design & Construction Division, Houston Airport System, 16930 J. F. Kennedy Boulevard, Houston, Texas 77032.

The submittal deadline is 2:00 p.m. on Monday April 20, 2009.
