City of Houston  
Houston Airport System

Design Build Services  
for  
Central Plant Upgrades Phase II and III  
at  
George Bush Intercontinental Airport/Houston  
Houston, Texas

Project No. 621  
CIP No. A-0091.27

The City of Houston invites submittals from qualified firms interested in providing Design Build services for Central Plant Upgrades Phase II and III at George Bush Intercontinental Airport, Houston, Texas. The scope includes a replacement 3340 Ton/Hr chiller, three each 28 MMBTU/Hr hot water heaters, replacement 5840 Ton/Hr cooling tower, and miscellaneous upgrades to the plant. Estimates of probable construction cost and time as well as work phasing recommendations to minimize construction interference with airfield operations will also be required. Firms and staff must be familiar with and meet the airport security and regulatory requirements. Work will be done according to standard City of Houston design build agreement. The project cost is expected to be approximately \$22,600,000.00 via the award of a single contract. The project is partially funded by a Federal VALE Grant.

All firms interested in providing such services should obtain a copy of the Prospectus, which includes a more detailed description of the work, Disadvantaged Business Enterprise (DBE) participation goal and the submittal requirements, at the office of Planning Design & Construction, Houston Airport System, 16930 John F. Kennedy Boulevard, Houston, Texas 77032 or on our website at [www.fly2houston.com](http://www.fly2houston.com).

The submittal deadline is 2:00 p.m. on Monday, September 14, 2009  
Prospectus will be ready for pick-up on August 10, 2009 after 2 PM.
