Benefiting the Snowdrop Foundation

Monday, November 2, 2009

Underwriting Sponsor

HOPE-COURAGE-LOVE

Mission Statement

Snowdrop Foundation provides funding for continued pediatric cancer research and scholarships for college bound pediatric cancer patients and childhood cancer survivors.

The snowdrop and its connection with childhood cancer patients:

The snowdrop is the first flower to bloom in the spring, even blooming when snow and ice is still on the ground. It is a hearty flower, nearly indestructible by nature. Childhood cancer patients demonstrate indestructible attitude and spirit while battling the life threatening illness of childhood cancer.

The snowdrop symbolizes hope and purity. Snowdrop Foundation celebrates the hope that one day a cure for all childhood cancers will be found allowing the purity of every child to remain untouched by the devastating diagnosis of cancer.

The snowdrop comes in twenty different varieties but only one color, white. Childhood cancer comes in many varieties but has only one intent, to destroy.

Finally, the legend of the snowdrop dates back to Biblical times. When Mary Magdalene saw Jesus crucified on the cross, she cried. Where her first tear hit the ground a snowdrop grew. When parents learn that their son or daughter has cancer, just like Mary Magdalene watching Jesus suffer, they cry too.

Snowdrop Foundation wants to end those tears forever, and we can with your help

Snowdrop Foundation Beneficiary

Today, Texas Children's Hospital is the largest freestanding pediatric hospital in the United States and is ranked among the nation's top four pediatric institutions by U.S. News & World Report, the only children's hospital in the South or Southwest on that list.

Texas Children's Hospital is dedicated to providing the finest possible pediatric patient care, education and research. And, true to the charge given by our founders over fifty years ago, care is provided to any sick or injured child, regardless of race, creed or ability to pay.

Snowdrop Foundation donations are designated for three specific areas of Texas Children's Cancer Center:

Adolescent Program

The adolescent program provides support for teenage patients within the Cancer Center. The program plans activities for teenagers, publishes a newsletter and provides an outlet for teens to express their feelings.

Continued Pediatric Cancer Research

Since 1960, the overall survival rate for children with cancer has increased from 10% to 70%. Thirty percent still need our help. Snowdrop Foundation's Childhood Cancer Research contribution provides that assistance.

Snowdrop Scholarships

Need-based college scholarships to Board of Director approved, college-bound Pediatric cancer patients and pediatric cancer survivors.
